

Movaro Fuel System Cleaner D

Keep That New Car Feeling Alive

DESCRIPTION

Movaro Fuel System Cleaner D is a premium diesel fuel additive formulated with cetane number improver and lubricity-enhancing technology. It enhances engine power and fuel efficiency while reducing smoke and exhaust emissions. The additive effectively removes carbon deposits accumulated inside injector nozzles and fuel pumps, maintaining clean injection and stable spray patterns over extended use. By improving the cetane number, it enhances combustion efficiency, improves starting performance, and reduces engine noise for smoother and quieter driving.

APPLICATIONS

- Exclusively for diesel engine vehicles (applicable to both passenger and commercial vehicles)
- Suitable for common-rail high-pressure injection systems and DPF-equipped engines

PERFORMANCE & BENEFITS

Injector Cleaning and Performance Restoration

Removes carbon build-up and restores spray patterns to improve combustion efficiency.

Cetane Number Improvement

Enhances fuel ignitability, improves cold-start performance, and reduces engine noise.

Improved Lubricity and Component Protection

Reduces wear on pumps and injectors, increasing system durability.

Better Fuel Economy and Lower Emissions

Minimizes incomplete combustion, reducing fuel consumption and harmful exhaust gases.

Reduced DPF (Diesel Particulate Filter) Load

Lowers soot generation, preventing DPF clogging and extending regeneration intervals.

USAGE INSTRUCTIONS

- Add one bottle (500 mL) for 50–70 L of diesel fuel.
- For best results, pour the product into the fuel tank before refueling to ensure natural mixing with the fuel.

KEY PROPERTIES

Appearance	Clear, light yellow liquid
Kinematic Viscosity @ 40°CcSt	1.053
Flash Point °C	64
Density @15	0.805
Package (ml)	500
